## World Bank list of economies (June 2020)

(Bold indicates a change of classification)

<i>Economy</i>	<i>Income group</i>
<p>This table classifies all World Bank member countries (189), and all other economies with populations of more than 30,000. For operational and analytical purposes, economies are divided among income groups according to 2019 gross national income (GNI) per capita, calculated using the World Bank Atlas method. The groups are: low income, \$1,035 or less; lower middle income, \$1,035 to \$4,045; upper middle income, \$4,045 to \$12,695; and high income, \$12,695 or more.</p> <p>Geographic classifications in this table cover all income levels.</p> <p>IDA countries are those that lack the financial ability to borrow from IBRD. IDA credits are deeply concessional—interest-free loans and grants for programs aimed at boosting economic growth and improving living conditions. IBRD loans are nonconcessional. Blend countries are eligible for IDA credits because of their low per capita incomes but are also eligible for IBRD because they are financially able to borrow from IBRD.</p> <p>Note: The term <i>country</i>, used interchangeably with <i>economy</i>, does not imply political independence but refers to any territory for which authorities report separate social or economic statistics. Income classifications set on 1 July 2020 remain in effect until 1 July 2021. Argentina, which was temporarily unclassified in July 2016 pending release of revised national accounts statistics, was classified as upper middle income for FY17 as of 29 September 2016 based on alternative conversion factors. Also effective 29 September 2016, Syrian Arab Republic is reclassified from IBRD lending category to IDA.</p>
